François Rostaing

Investment Systems Builder | PE & Quant | Python | CFA Level I Candidate

francois@frostaing.com +41 78 247 49 64 frostaing.com LinkedIn github.com/FrancoisRost1

Certifications

- CFI Financial Modeling & Valuation Analyst (FMVA®) — Completed
- Microsoft Power BI Data Analyst Associate (PL-300) — Completed
- CFA Level I — Expected August 2026

Experience

Independent Research & Financial Modeling — Geneva, Switzerland
Investment Analyst | Quantitative Projects — Jan 2026 – Present

- Built 11 production-grade financial systems in Python replicating institutional PE, quant, and systematic fund workflows. 1,388 tests passing across all projects. All live and documented at frostaing.com.
- Shipped a unified research terminal (live at mini-bloomberg.com) integrating all engines into 6 institutional workspaces with live market data, deterministic stock ratings, and optional LLM memo synthesis.
- Systems span LBO simulation, PE screening, factor backtesting, options pricing, portfolio optimization, volatility regime detection, and cross-asset momentum.

Francois_rost1 (Digital Media) — Athens, Greece (Remote)
Content Creator & Community Builder — Dec 2023 – Dec 2025

- Built and scaled a 100,000+ audience across social platforms through data-driven content strategy and analytics.
- Managed end-to-end content production, brand partnerships, and community engagement metrics.

Rostaing Vietnam — Ho Chi Minh City, Vietnam
Finance & Strategy Lead — 2021 – 2023

- Led financial restructuring during COVID-19, preserving profitability and operational continuity.
- Reduced operational costs by 15%, improving EBITDA margins and cost efficiency across the business.
- Built financial models for forecasting and strategic planning; led preparation of financial package enabling a successful company sale in 2023.

Selected Projects (mini-bloomberg.com | frostaing.com | GitHub)

- **AI Investment Research Agent:** 6-engine deterministic recommendation system with composite scoring, dual-layer confidence grading (A to F), parallel fault-tolerant execution, and optional LLM memo synthesis. 203 tests.
- **LBO Simulation Engine:** Full PE deal simulator with entry valuation, capital structure, debt scheduling, scenario analysis, Monte Carlo (500 runs). Automated IC memo with BUY/SELL/PASS ratings.
- **Portfolio Optimization Engine:** Mean-variance, HRP, and Black-Litterman with covariance cleaning (Ledoit-Wolf, RMT). 14 ETFs, 10-year rolling backtest. HRP Sharpe 0.62. 166 tests.
- **Factor Backtest Engine:** Multi-factor backtesting across 503 S&P stocks over 10 years. Five factors (value, momentum, quality, size, low vol), quintile portfolios. Quality factor Sharpe 1.55. 166 tests.
- **Options Pricing Engine:** Black-Scholes, CRR binomial, and Monte Carlo with variance reduction. 8 analytical Greeks, IV extraction, empirical vol surface, delta hedging simulation. 230 tests.

Education

École hôtelière de Lausanne (EHL) — Switzerland
Coursework in Hospitality Business Administration — 2017 – 2021
Coursework: Financial Accounting, Managerial Finance, Statistics, Business Analytics

Australian International School — Ho Chi Minh City, Vietnam
International Baccalaureate (IB) Diploma — 2015 – 2017

Skills & Interests

Technical: Python (pandas, NumPy, SciPy, Streamlit, Plotly), SQL (DuckDB, SQLite), Financial Modeling (DCF, LBO, multiples), Monte Carlo Simulation, Portfolio Optimization, Factor Models, Options Pricing, Power BI, Advanced Excel
Finance: PE Deal Analysis, Systematic Strategies (TSMOM, Volatility Targeting), Risk Assessment, Signal Research, Backtesting, P&L Management
Languages: French (Native) • English (C2) • Greek (A2–B1) • Chinese (Basic)
Interests: Content Creation (100k+ community), Sailing, Padel, Golf
